WORK EXPERIENCE

DApp Developer

BSC GAMES

MARCH 2021

Remote

Collaborated with the blockchain developer to build a DApp and integrated the smart contract by creating the contract instance from the contract address and ABI, which was then used to read data from the contract and send transactions

PROJECTS

- ✓ **BSCG:** This is a Dapp. A blockchain based game where user places bet with a cryptocurrency (BNB) the user either win or lose, if a user wins, the winning amount is credited to the user's wallet, if otherwise, the amount used to place the bet is gone
  Built with: React JS, web3js
  Link: https://hardcore-meninsky-707284.netlify.app/

- ✓ **Nerdycruise:** This is currently a work in progress. It is web web Application intended for Nigerian secondary school students, most especially those preparing for their SSCE and UTME. On this platform, they will able to take test and get result immediately the test is completed. In addition, they will also be able to manage their profiles and participate in a forum discussion that is strictly meant for academic talk only
  Built with: React JS, Express, Postgresql
  Link: https://nerdycruise.herokuapp.com/

- ✓ **Weather App:** A progressive web application that tells the weather condition of any city in the world with the help of OPEN WEATHER MAP API
  Built with: html, css, javascript (without any framework)
  Link: https://weather-pwa-aap.web.app/

- ✓ **T-BEST FASHION:** A website for a local fashion design shop.
  Built with: React JS
  Link: https://t-best-fashion.web.app/
